

3 DIE IN TEXARKANA STORM

Here and There

Editorial By ALEX. H. WASHBURN

ROOSEVELT'S social security program has passed both houses of congress, and when the house concurs in senate amendments the bill will be ready for signature. It would be wise to take a moment to go over some of the provisions of the measure so we will know where we stand this moment in our nation's changing history.

Bailey Outlines Effect of State 2 Pct. Sales Tax

Wiseman Gets Attorney General's Ruling for His Guidance

ITEMS UNDER TAX Exemptions Only Those Specifically Mentioned by Hall Law

LITTLE ROCK.—Attorney General Carl E. Bailey sent an opinion to Revenue Commissioner Earl R. Wiseman Thursday, answering a score of questions concerning legal points in connection with the new 2 per cent sales tax law.

Commissioner Wiseman said he will use the opinion as the basis for additional regulations which he expects to complete Friday or Saturday.

Retrospective Clause Invalid

The attorney general held that the retrospective provision of the law attempting to apply the tax to credit sales on the basis of collections, even though the sale was made before the law was passed, is unconstitutional and invalid.

The attempt to apply the tax to a sale completed before the act became effective, although paid for on the installment plan, would be in conflict with the due process clause of the constitution, the opinion said. Another reason given for holding this phase of the law invalid is the fact that the dealer cannot assume the tax, which he would have to do if the purchaser refused to pay it, because any attempt to make the consumer pay a tax that did not exist at the time of the purchase would constitute an impairment of his contract of purchase.

In Favor of State

The opinion on various phases of the sales tax law, prepared by Assistant Attorney General Thomas Fitzhugh, was prefaced with a clarifying statement, in which it was said that a general interpretation cannot be made to fit all situations that will arise and that doubt would be resolved in favor of the state since the "aggrieved taxpayers will have their remedies in the courts."

Mr. Fitzhugh said the Arkansas sales tax law was not patterned after the law of any other state and that there were few precedents on which to base rulings contained in the opinion. He said opinions will not be given to other persons or agencies, so that all matters pertaining to collection of the tax can be cleared through the Revenue Department.

The opinion, covering 10 typewritten pages, was in question and answer form, and included quotations and citations from court decisions in many instances.

Summary of Findings

No food other than those enumerated in the act are exempt from the tax.

These foods, flour, meat, hard sugar, soda, baking powder, salt, meal, butters and eggs, are to be given the common everyday definition as understood by the public.

Meat was held to include fresh or cured meats of animals or fish, other than shell fish, but does not include

Army Officers in Conference Here on Fate of Camp

Assert It Was Impossible Ever to Promise White CCC Camp

TO POLL RESIDENTS Government to Ask Alton Residents If Negro Camp Is Acceptable

Two army officers met a delegation of Hope men in the offices of O. A. Graves Friday morning to adjust the controversy over whether the CCC soil erosion camp now under construction at Alton, south of Hope on the Lewisville highway, is to be manned by whites or negroes.

Major Baer, who was accompanied by Captain Miller, told the Hope group that there were only so many CCC companies available, that the negro companies had to be placed somewhere, and that unless Hempstead county accepted a negro company the Alton camp might be dismantled.

It having been represented to the Hope delegation that a protest had been made against a negro company by residents in the Alton neighborhood, it was agreed to poll public sentiment in that section.

The Hope delegation insisted they had understood a white camp was originally promised, but the army officers said no one had ever been in a position to make such a promise, the federal government holding itself responsible for placing both negro and white companies in conservation work.

Present in behalf of the state was W. A. Rooksberry, Little Rock, director of the U. S. Employment Service, assisted by W. R. Dyess in charge of CCC camps and social service. Mr. Rooksberry agreed to send field men to the Alton neighborhood to ascertain the feeling of residents there.

The Alton camp is one of 13 permanent camps planned in the state, with 13 portable plants to be built later.

Others present at Friday's conference were: O. A. Graves, J. R. Henry, County Agent Frank Stanley, Mayor Albert Graves of Hope, Assistant County Agent Carroll Morrow, Joe R. Floyd of the Hope district federal office, and A. H. Washburn.

About a week ago I made the rounds with a Pennsylvania bank agent collecting mortgage interest. One little old lady was four months behind and about to lose her home.

The bank agent and I had been having an argument over the government's social security program. Incidentally he was complaining about the possibility of foreclosure on this widow's home.

Imagine the situation, therefore, when upon our arrival we learned that she had just been put on the state pension rolls, had been paid four months' accrued pension—and had the mortgage interest money waiting!

It settled the argument!

Artificial Heart Built by Science

Charles A. Lindbergh Credited With Remarkable Medical Discovery

By HOWARD W. BLAKESLEE, Associate Press Science Editor

NEW YORK.—Col. Charles A. Lindbergh, turned scientist, has made an artificial heart and lungs at the Rockefeller Institute, bringing to success a century-long quest of medicine to cause whole parts of the body to live indefinitely and even grow in glass chambers, where they are placed and revived after surgical death.

The announcement was made in Science Thursday night. Lindbergh, teamed with Dr. Alexis Carrel, and signs the story with him. Dr. Carrel has the Nobel prize for similar work in making "tissues" live under glass.

But the new achievement has nothing to do with the old tissue culture, the announcement explains.

Whole organs not only live but grow. They offer a new field of discovering the nature of disease and its cure, its internal cause directly visible under the scientists' eyes.

Twenty-six times the announcement says, the Lindbergh pump has worked successfully. Spleen, hearts, kidneys, thyroids, ovaries, and suprarenal glands were revived and lived indefinitely. They were taken from animals an hour after they had been dead.

For 123 years this has been attempted. Of late there had been some temporary success, the organs lived a while.

But infection, which got into them in their artificial housing, was the same as in living bodies, and their after-life short. The Lindbergh pump solves this problem, being so mechanically perfect that no infection enters.

The pump, an artificial heart and lungs combined, is not described. At the institute information about it was refused.

However, the announcement reveals

Arkansas Levee Breaks; 15,000 Acres Flooded Near Morrilton

Red River Still Rising, Reaches 32 Feet Friday—80 Men at Work on Threatened Levees

LITTLE ROCK.—(AP)—The Arkansas river broke through the White levee in the Morrilton area Friday, cracking a dike protecting 15,000 acres of Conway county plantation property south of the river.

The Austin levee on the Pope-County way county line had previously gone out, flooding 40,000 acres in both counties.

Morrilton reported the entire bottom from Reid's Ferry in Pope county to Morrilton in Conway county to be under water. All families had fled from that vicinity.

Rain fell in west central Arkansas Thursday night, causing further apprehension.

There were further indications, however, that the flood crest had passed Fort Smith. It was predicted the week-end stages at Little Rock and Pine Bluff would be only slightly changed. The river dropped 2 feet at Fort Smith.

The forecast for the Arkansas river was 31.5 feet at Ozark Friday, 30.5 feet at Dardanelle Saturday, 29.5 feet at Little Rock on Sunday, and 31.5 feet at Pine Bluff Monday.

Red at 32 Feet

Rampaging Red river became more alarming Friday in the Fulton area with a rise of better than two feet within the past 24 hours.

The gauge at the toll bridge at noon showed 32 feet. Eighty relief workers from the Hope office of the

FERRA were dispatched to danger zones early Friday.

The office stood ready to send 200 or 300 additional men when called.

The town levee at Fulton was being strengthened. Another group of men were filling sacks to be used south of Fulton, while other groups were filling in low places from Fulton as far south as the Flood Gate.

Land owners have been at work for the past four days, furnishing private labor. The Arkansas Highway department and the county are furnishing trucks and machinery.

A forecast of 34 feet is predicted by Saturday, which would send the stream within 3 of an inch of the highest stage this year. No breaks have occurred, although the muddy water of the stream is lapping toward the tops of dikes in several places.

It was predicted that additional rainfall Thursday night and Friday would send the river to 34 feet or higher.

More Rain

LITTLE ROCK.—With predicted rain in northwest Arkansas Friday as an added menace to thousands of plant-

Cast of Y. B. M. A. Play Is Announced

Amateur Benefit Show to Be Presented at the Saenger June 27-28

"The World's All Right," amateur show which will be presented at the Saenger theater June 27-28 by the Young Business Men's association, is a new and different type of entertainment.

The outstanding comedy number is the Hill Billy scene in which a number of prominent singers and actors play the part of old-time hill-billies and sing "My Blue Ridge Mountain Home," "She'll Be Comin' Around the Mountain" and "They Cut Down the Old Pine Tree."

Sheriff Bearden, Luther Higginson, Lon McLarty Nelson Frazier, Logan Bailey, Ladd Miller, will give an old time square dance. A bang-up rehearsal Thursday evening brought forth much favorable comment from enthusiastic spectators.

The high spot of comedy in this scene is the pantomime of an old-time melodrama, "Frankie and Johnnie," Paul Jones as Johnnie, the city slicker.

Armstrong as Frankie, his sweet heart, Sid Bundy as Smokey Joe and Bob Travis as Nellye Blys, the vamps, act out the melodrama as the words of the song are sung. E. P. Young and William Bundy have the roles of the two hill-billies, Hiram and Si in the line last moving.

The Hill Billy Harmonizers who add the singing and fun are George Wilson, Glen Durham, Claude Taylor, Otha Taylor, Sweeney Copeland, Jim Bowden, Raymond Jones, Bus Slusser, Clifford Miller, Logan Bailey, Jim Bearden, Clifford Franks, Ladd Miller, J. W. Wellborn, A. R. Whitlow, E. Sandlin, Paul Rowe, Finis Johnson, Latt Moss.

The band which will be led by John Ridgill is: Winfred Huckleby, Ernest Ridgill, Riley Huddleston, Lester Huckleby, Ambrose Bright, Granville Bright, Paul Edwards, Stewart Hunt, Harold Roberts and Lon Edwards.

Mrs. Clyde Monts takes the part of the Tell-Me-a-Story Lady.

Drive for County Agent Fund Still Short of Its Goal

DeRoan Township Near \$500 Quota—But \$1,200 Total Not Reached

VITAL FOR COTTON \$10,000 in Checks Undelivered as Sevier Drops County Agents

Unofficial tabulation of funds collected to retain Hempstead county's agricultural agent and home demonstration agent showed Friday that several hundred dollars was lacking in the drive to obtain \$1,200 by Saturday, under threat of having the local office closed.

Committees were busy Friday canvassing the downtown section of Hope and throughout the 12 townships of the county to obtain the quota assigned each at a mass meeting of citizens held at Hope city hall Tuesday afternoon.

DeRoan township, it was reported, was nearing its goal of an assigned quota of \$500. Some townships were running behind while still others were making satisfactory progress.

Halley White of Hope is treasurer of the drive, and in the event any person or firm is overlooked who desires to contribute to the fund this may be done by contacting Mr. White.

Trouble in Sevier County

DE QUEN.—Cotton rental checks totaling \$10,000 and payable to 500 Sevier county farmers have been received here but cannot be distributed due to lack of the county's half of the agent's salary.

Committee's working over the county to raise \$1800 by subscription as the county's part are not meeting with much encouragement.

District Agent J. L. Wright had set June 17th for closing the office here and moving the records but was asked by Judge O. Kelsb for a few days extension to permit committees to complete the canvass.

If the office is not reopened checks will be forwarded to an adjoining county seat where there is an agent and payees will have to call there for their checks. M. F. Stanford, local agent whose office is closed, said.

E. L. Cannon Dies at Columbus Home

Succumbs at 65 Following Long Illness—3 Children Survive

E. L. Cannon, 65, died at his home in Columbus early Friday after an extended illness.

He is survived by his widow, two sons, Arthur Cannon of Columbus, and Willie Cannon of Hope; one daughter, Mrs. Maude Jones of Hope; three brothers, C. A. Cannon, Saratoga, George and R. W. Cannon of McNab, one sister, Mrs. Wilma Williams of McNab.

Funeral arrangements were not announced.

109th Birthday of Oldest Arkansan

Mark Holland Has Ridden in Both Ox-Carts and Airplanes

MOUNTAIN HOME, Ark.—(AP)—Mark Holland, 109 last May 17, has seen the country develop from the primitive to the ultra-modern and believes that the old days were the best because "people were happier then."

They lived simpler in the days when Uncle Mark was a boy, he says, and took care of themselves. He thinks the people "got along all right without all the new things like cars, radios and other modern conveniences."

This Confederate veteran who probably is the oldest man in Arkansas speaks of modern modes of travel "in the know." He has ridden in everything from an ox cart to the airplane, choosing the latter at the age of 94 when everyone else here appeared somewhat timid at traveling in the first plane to land in this section.

Uncle Mark Holland is feeble but can get around by himself most of the time. He was born in Kentucky in 1826, but cannot remember the exact place of his birth. The family went from Kentucky to Texas before coming to Baxter county where he has lived the past 63 years.

The veteran says he served in a Kentucky regiment during the Civil war. He believes it was the Second Kentucky regiment, but Uncle Mark does not remember exactly which company. He is the father of four sons.

Honored

E. F. McFaddin

Congratulations Sent to McFaddin

Hope Club Honored by His Election as Rotary U. S. Director

E. F. McFaddin, who on Thursday was elected one of the five American directors of Rotary International at that organization's convention in Mexico City, was tendered the congratulations of the home club Friday when Hope Rotarians ordered a message forwarded to him at the convention city.

Mr. McFaddin has served as president of the Hope club, governor of the 62d (Arkansas) district, and during the past year has been chairman of the club service committee of the international organization.

The Rev. Thomas Brewster, speaking to the local club, said it was generally conceded Mr. McFaddin has an excellent chance of being elevated to the presidency of Rotary International in the near future.

Also attending the Mexico City convention is Roy Anderson, president-elect of the Hope club.

The speaker at Friday's club luncheon at Hotel Barlow was the Rev. Bob Naylor, of Nashville, Ark., presented on a program directed by Bob Morris.

Guests were W. A. Rooksberry, Little Rock, assistant to W. R. Dyess in charge of CCC camps and social service; and Joe R. Floyd, head of the Hope district federal office.

Wealth-Sharing Tax to Be Delayed

Congress of Opinion Program Will Go Over to Next Congress

WASHINGTON.—(AP)—Democratic legislators, uncertain whether President Roosevelt wants his proposals for new taxes on the wealthy to be enacted now or later, indicated Friday they are planning to ask him about it.

If the program is postponed until the next session it will be thrown into the campaign year 1936.

Some confidants of the president indicated he is ready to press the plan through the presidential campaign, thus making it a major issue.

May Be Delayed

WASHINGTON.—(AP)—President Roosevelt's proposal of new taxes on huge fortunes threw congress into utmost confusion Thursday as to whether immediate action was demanded.

The senate finance committee refused to sanction a move to incorporate a series of "wider distribution of wealth amendments to the house approved resolution extending \$500,000,000 in nuisance taxes. But the move was sidetracked only temporarily.

Senator La Follette, Progressive, Wisconsin, who proposed the new taxes, said he would renew his efforts on the floor, and Senator Long, Democrat, Louisiana, advocate of more extreme share-the-wealth taxes, said he would fight for them to "put them (the administration forces) on the spot."

La Follette said he had not completely worked out the amendments, but indicated they would include some proposals not mentioned by the president. He estimated they would raise from three-fourths to a billion dollars.

Democratic leaders were divided as to the practicability of obtaining action before the summer adjournment. The general impression was it should be considered "must" legislation, "if possible" but that, under existing conditions, it would go over until next winter.

It was reported that President Roosevelt would send a letter to Chairman Harrison, Democrat, Mississippi, of the senate finance committee, informing him the new program was not necessarily for immediate consideration.

15 Injured, Much Property Lost, as Tornado Strikes

White Farmer and Son, and Negro, Are Victims of Storm

AIRPORT IS STRUCK Grim Hotel in Texarkana Damaged as Storm Rides in From Texas

Three persons were killed, 15 others were in Texarkana hospitals, and property damaged was thousands of dollars, as the result of a devastating tornado which struck Miller, and Bowie counties at 9 o'clock Friday morning.

The dead: Dempsey Freeze, farmer of near Red Lake community, five miles west of Texarkana.

Willard Freeze, two-year-old son of Dempsey Freeze.

Dunbar McCartney, 30, negro, crushed to death at Texarkana airport.

Six other negroes were injured when the storm bore down on the airport, sweeping away hangars and uprooting trees in that area.

Damage at the airport alone was estimated at \$10,000.

Of the 15 persons in hospitals, 11 are negroes. The other three persons are Mrs. Dempsey Freeze, injured when her husband was killed west of Texarkana.

Mrs. Freeze's two children are in the hospital. One of them, a small girl, is not expected to live. Condition of Mrs. Freeze was reported critical.

The storm blew into Miller from Bowie county Texas, demolishing outcroppings and uprooting trees.

A corner of a building in downtown Texarkana was blown away. The Grim hotel was struck. Battered windows and screen doors was the extent of damage to the hotel.

A number of other buildings and homes in Texarkana were damaged. No one was reported killed in the immediate area of Texarkana.

The heaviest property damage occurred in Miller county, telephone reports to The Star from Texarkana disclosed. Much rain accompanied the storm.

British Unworried Over Italian Anger

Think It Unlikely Mussolini Will Bolt From League of Nations

LONDON, Eng.—(AP)—British governmental sources said Friday they refused to consider that there was any real danger Italy would bolt the League of Nations, despite alarming reports in the Italian press.

Official sources said they regarded the reports as bluff.

Meanwhile, three disputes held European attention.

Foremost was the Anglo-German naval agreement under which Germany can build a modern navy, 35 per cent at large as the British fleet.

Captain Eden goes from Paris to Rome to seek peace in the Italian-Ethiopian dispute.

Yugoslavia is without a cabinet following the government's resignation as German and Italian influences seek to gain control.

Markets

NEW ORLEANS.—(AP)—The absence of any worthwhile developments in cotton was reflected at the start of trading on the market and prices opened practically without change from the previous close.

The July and October positions were unchanged while other months changed had a point or two higher at the first call.

December sold at 11.27, January at 11.20, and March at 11.37, and the prices held around these levels during the first hour.

NEW YORK.—(AP)—Cotton futures opened steady, unchanged to 2 higher with commission house liquidation being taken by the trade. July 11.30; October 11.29; December 11.32; January 11.33; March 11.39; May 11.45.

LIVERPOOL.—(AP)—Cotton 27,000 bales including 1100 American. Spot moderate business done; prices one point higher; quotations in pence; American strict good middling 7.29; good middling 6.98; strict middling 6.84; middling 6.79; strict low middling 6.60; low middling 6.44; strict good ordinary 6.24; good ordinary 5.94. Futures closed steady. July 6.35; October 6.05; December 5.98; January 5.97; March 5.96; May 5.94.

YOUR HEALTH

Editor, Journal of the American Medical Association, and of Hygiene, the Health Magazine

Nation Can Stamp Out Menace of Diphtheria.

Each year the Journal of the American Medical Association makes available records of the number of deaths from diphtheria in foremost American cities.

As has been repeated again and again in these columns, diphtheria is a disease of which the cause is known; for which we have a method of determining whether a person is likely of catch it if exposed to it; for which we have a specific method of prevention; and for which there is a specific method of treatment.

If everybody recognized the value of these methods and took advantage of them, it is quite likely that diphtheria could be completely stamped out in the United States within the next two generations.

However, some people still will not avail themselves of what science has to offer. In some parts of the country, there seem to be more of these than in others.

The figures just collected and made available for 1934 show that diphtheria has continued to decline in the New England and South Atlantic states, that it has increased slightly in the Middle Atlantic and east north central regions, but that the east south central states have not been able to equal the steady decline in diphtheria rates that has taken place in other parts of the country.

Most of the west north central and west south central states have also been able to lower their rates considerably.

Specifically, there were 15 cities in the United States without a death from diphtheria in 1934. These were Cambridge, Canton, Duluth, Elizabeth, Grand Rapids, Long Beach, New Bedford, New Haven, Salt Lake City, Seattle, South Bend, Chattanooga, Knoxville, Syracuse, and Utica.

There are also six cities whose diphtheria death rates steadily declined from 1930 through 1934. They are Baltimore, Cincinnati, Hartford, Jersey City, New York, and Philadelphia.

Boston has recently had the lowest diphtheria rate in the country, but the rate for Somerville, Mass., near Boston, is one of the 10 highest.

The group of cities with the highest rates are in the east south central states and include Birmingham, Memphis, Louisville, Chattanooga, Knoxville, and Nashville. Apparently a campaign of education and control is necessary in these areas.

The value of such campaign is indicated by the benefit obtained from one by the city of Chicago, where the rate for 1925-29 was 11.7, but where the average from 1930-34 was only 4.3.

Again it should be emphasized that diphtheria is amenable to scientific control and that every community should do its utmost to apply scientific measures in stamping out this disease.

A BOOK A DAY

Book Details Home Life of Pioneers Woman Recalls Simple Doings of West's Early Settlers

Reading of many volumes about pioneer days leaves one, at times, yearning for information that would reveal the type of home life that was so typical of the country's old settlers, while they fought and struggled for a living.

That's just what you will find in a pleasant little book called "Sunbonnet Days," written by Bliss Isely. That and much more, for it gives you the woman's viewpoint of life out in Kansas, when land was opened up to immigrants from the east and from foreign countries, and it tells the story in the charming way of a 93-year-old woman, who still lives in Wichita.

For Mrs. Isely has set down the incidents of pioneer home life in the words of his grandmother, who, as a Swiss girl, came over in a windjammer with her parents and two brothers, settled across the river from St. Joseph, Mo., and took part in the simple, everyday activities of the country folk.

These activities, from cheese-making to quilting, from making candles and soap to building homes and de-

Arkansas Levee

(Continued from Page One)

ed acres and homesites, the front of the flood battle was concentrated Thursday at levees where workers rushed reinforcements into place in preparation for further rises in major streams.

Federal engineers, land owners, tenants and volunteer workers were joined by hundreds of FERA workers and a force of convicts assigned from the penitentiary in a fight to build up danger spots in levees along the Arkansas river.

Levee work continued in the White and Red river basins, with 4,000 FERA workers distributed throughout the state for flood duty.

At Pine Bluff, levees were sandbagged throughout Thursday night and danger spots were watched closely for signs of strain. In the Ash Flat community of Jefferson county about 1,000 men worked on the Plum Bayou levee, and minor damage to levees at Reydell and English was hurriedly repaired.

State officials expressed fear for safety of the Negro Boys Industrial School near Pine Bluff, and army tents were sent for use there if water in that vicinity continues to rise.

Three hundred feet of the District No. 3 levee in Pope county, 10 miles south of Atkins, went out at noon Thursday, flooding about 25,000 acres, and 100 relief workers were put to work sandbagging other sections of the levee.

Approximately 100 families fled from their homes in Conway county Thursday when the Austin levee broke, making a total of 400 homeless families who are refugees in Morrilton.

In Faulkner county there was hope that the levees would withstand further damage, in view of the Weather Bureau's lowered forecast of nearly 30 feet, but farmers in the areas affected continued to move out.

Refugees continued to arrive in Russellville, Fort Smith, Cotton Plant, Conway and Pine Bluff, and army tents were distributed in Jefferson, Van Buren, Conway, Faulkner, Prairie and Pulaski counties for use of those rendered homeless by floods.

Congressman John L. McClellan telegraphed from Malvern to the ECW in Washington, urging immediate assignment of CCC enrollees to flood duty along the Arkansas river.

Rising backwater covered more than a square mile of residential property in Greater Little Rock, and city officials continued to move families in the flood area to higher ground.

Red Cross and FERA officials estimated that 2,000 families have been forced from their homes by the flood.

A large area between Corning and the Black river was flooded with water pouring through several levee breaks and many families leaving the lowland section. Highway No. 1 between Corning and Pargould was impassable.

The Little Black and Current rivers in the extreme northeastern corner of the state were reported rising.

Woman to Get

(Continued from Page One)

board will find that the costs will not run as high as the actuarial estimates presented to the congressional committees. Actuaries always leave themselves a good margin.

"I think the implications of the social security bill are broader than NRA. The aid to children and mother will give them a family life. A man can work with enthusiasm, grow old with confidence that his future will be taken care of."

Cross-Talk

Two ladies were sitting at an open window. One was listening to a church choir practising across the way.

The other was listening to the noise of the crickets.

The first one said, "How loudly they sing to-night!"

And the other one said, "Yes, and they tell me they do it with their hind legs."—Atchison Globe.

seven as other women who have been home all afternoon.

She simply must learn to make every minute count, meanwhile managing to keep calm. After all, to look poised and at ease with the world is as necessary to beauty as neat clothes and the right cosmetics, skillfully applied.

The first step, of course, is a warm bath. While the water is running into the tub, get out stockings, shoes, gloves, fresh underwear and the gown you intend to wear. At this point, you shouldn't have to spend time changing cosmetics from your street purse to your evening bag.

The ideal system is to leave evening lipstick, powder, rouge and comb right in the bag where they belong, never taking them out for daytime use. See that you always have clean evening hose and handkerchiefs on hand.

Clean face and neck with cleansing cream or soap and water and smooth on a layer of nourishing cream before you get into the tub. This way, the tissue cream has a chance to absorb while you are busily using a long-handled bath brush on arms, shoulders and back.

If your nails need a bit of attention, give it to them while you are sitting in the warm water. However, if you get a weekly manicure, and go over them yourself twice a week, there's no reason why you should have to waste time on them in the rush of dressing.

When you have finished your bath, apply cologne in a scent to match the perfume you intend to wear, slip into your lingerie, stockings and shoes and then make up your face, neck and shoulders and arrange your hair before you put on your gown. Give your hair a final pat, dab perfume on your skin—never on clothes—and then sit down calmly to wait until your escort rings the doorbell.

All of this shouldn't have taken more than forty-five minutes. What-every is left should be devoted to reading or just plain sitting. Once you're ready, resist the temptation to keep on patting and fussing. Sit down and relax.

NEXT: Gadgets for the sports-woman.

Gossip Note

The African Guereza monkey has a colic-like brush the end can well be called the most beautiful of all monkeys, if they can be classed as beautiful.

All our seasons are of different length. Spring has 92 days and 21 hours; summer 93 days and 14 hours; autumn 89 days and 18 hours; winter 89 days, 1 hour.

The "man in the moon" sometimes nods his head, and sometimes shakes it back and forth. For this reason, we can see about seven-twelfths of the moon's surface.

Summer Sweethearts

By Mabel McLellott © 1935, NEA Service, Inc.

BEGIN HERE TODAY KATHARINE STRYKHURST, 20 and beautiful, allows her emotions to rule when she marries MICHAEL HEATHERSTONE, young riding instructor who comes into a title and fortune. Katharine's father is rich and her stepmother is a snob.

The night following his marriage Michael is injured in a traffic accident and when he regains consciousness his memory is impaired. He forgets the marriage. Katharine, unaware of this, believes he has deserted her. She returns to New Mexico and her friend, VIOLET MEISER, agrees to engage a lawyer in her absence to arrange an annulment of the marriage.

DR. JOHN KAYE, an old friend, sees Katharine off on her trip. He tells her he has always loved her.

SALLY MOON, who has married Michael into a sort of engagement, plans for their wedding. She is anxious to see the marriage to Katharine. Suddenly during a rehearsal of the ceremony Michael recovers his memory.

NOW GO ON WITH THE STORY CHAPTER XXXVIII

MICHAEL dashed out into the quiet street. Dusk had fallen half an hour before. There was the scent of bonfires in the darkness.

His heart was pounding in his breast like a mad thing. The words Annabel had said so carelessly and jauntily were echoing in his brain. "I . . . take thee . . . for better, for worse . . ."

A veil had been torn from his eyes. He was seeing clearly now for the first time in weeks. In this new dream there was a slim, fair-haired girl with eyes that burned deeply, darkly blue. In the dream she put her hand in his. She said the words Annabel had said, but with a difference. "I, Katharine . . ."

How could he, for one single instant, have forgotten her? He must have been half-mad.

A roadster, careening on two wheels, shot down the road and went around a corner. Michael, in the shadow of the hedge, watched it go. Sally's car. But tomorrow—why, good God, tomorrow he was supposed to marry Sally in that very church from which he had just fled! And who was Sally but a posing stranger? What a frightful mess!

Lucky for him this revelation had come on his wedding eve instead of his wedding night. Sally would have to know. He could imagine her rage and, manlike, blanch at the thought. It would have to be got through somehow. He could face it, with the thought of Katharine to sustain him.

His heart lifted at the bare notion. Katharine—his wife! But where had she been all these

weeks? What had she been thinking of him?

If he went home now Sally would be certain to find him. Later to-night he would face it, but just now the important thing was to learn about Katharine.

HE strode along toward the Merger house. That dark-haired woman who had looked at him so oddly the other day; she was Katharine's friend. She would tell him what he wished to know.

The house was in darkness except for a glimmer of light in the servant's wing. Michael knocked, and a stout, colored woman in a striped dress came to the door. Mrs. Merger was in the city, she said. She would not be back until late.

Michael went back to the village and called the Strykhurst house from a pay station. A warm Irish voice informed him that Miss Katharine was in the west. Did the gentleman care to speak to Mrs. Strykhurst?

Bertine's lofty accents. "This is Mrs. Strykhurst. Who is he calling?"

"It's Michael Heatherstone." You could sense the steely coldness with which Katharine's stepmother armed herself. "Is it business?"

His voice was harsh with tension and anxiety. "It's personal."

"I'm afraid I cannot give out my daughter's address so casually," Bertine told him. Before he realized what was happening she had hung up on him.

Well, it was not to be wondered at, he muttered to himself, curling his rage. Doubtless Bertine had heard he was to be married to Sally Moon tomorrow morning.

He went back to the Moons, loathing his errand, but bound to see the thing through. Sally's father, a long black cigar clamped between his teeth, glared at him.

"Well, well, young man. What's up? The girl's upstairs having hysterics. Thought you'd run out on her. A fine way to behave," fumed the older man.

"Terribly sorry, sir," he plunged into his story. Married weeks ago. The day of the accident. The whole thing washed from his brain by that blow on the head . . .

You mean to tell me—you mean to stand there and tell me calmly—"I was a mistake, sir. From the very start."

JOSEPH MOON stared. Sally had involved him before this in many a situation. This, he told himself, was positively the worst yet. He groped for a chair and dropped into it heavily.

"It's an outrage," he roared. "Blatter for the law—I'll have to see my attorney."

Michael had to listen to a good deal of this, and he did so patiently. He was sorry for the old man. It was all his own fault. He felt a cad and a villain.

"May I see S. J. J. sir?" "See her? Of course you'll see her! Wouldn't tell her myself or

a million dollars." Joseph Moon rang a bell and told Freda to ask Miss Sally to come down to the living room.

Annabel peeped through the French doors and made a round "o" of her mouth at sight of Michael. He could hear Sally's step on the stairs, her high heels clattering. She flung herself in the room, rage stamping her features.

"What's wrong with you? What do you mean running off like that? Making me a laughing stock—"

Michael took her hands. She beat at him in her fury as though she would hurt him grievously. It was her pride that was hurt, not her love, he reminded himself. He must remember that.

Somewhat he made her understand. She screamed at him and Annabel, tiptoeing in the hall, flinched at some of the words Sally used. Michael gripped her wrists.

"Listen, I'm sorry. Sorry as I can be. But it's too late now."

"You fool, you fool!" raged the girl. "How dared you? I'll sue you—sue you both. I'll drag your names through every court in the land—"

MICHAEL'S knuckles whitened. He could stand it. It wouldn't matter to him. But Katharine—he couldn't let her do this to Katharine.

Sally's shrill voice screamed on.

"You remember I told you from the start it was a mistake," Michael said quietly.

"That's right—that's right. Say I proposed to you!" the girl taunted him.

He released her, shrugging his shoulders. His imperturbability roused her to a fresh torrent of abuse. Her father appeared in the doorway.

"Listen, kiddo," he began pacifically, "you don't want them saying in the town you were fitted, do you?"

"Let them—if they dare!" Sally cried. Her bosom heaved. Her dark hair was in a fine disarray. Her dark eyes flashed lightning.

"But that's what they'll say if you go after Michael," the old man put in shrewdly. He had been thinking deeply as he sat in his study, within sound of her vehemence. This—this would never do! His business, his reputation in Innisbrook would be ruined if Sally stormed through the courts with her untamed rage unleashed.

"They'll say it anyway," the girl flung at him, not to be put off so easily.

"No, they won't," the old man told her. "No, they won't. We'll give it out that Michael had a relapse. That he hadn't recovered from the illness—that the marriage is indefinitely postponed. Then you can go off to Paris; you've been wanting to do that for a long time. You know you have—"

"You mean that? You're not just trying to calm me down?"

"I mean it. You can sail as soon as you like. Stay all winter. Procks and hats galore—"

Under her tempestuous airs Sally shrewdly estimated the situation. But she would not satisfy them. "I'll think about it," she said, regarding the two men between narrowed lids.

"Someone's got to pay for this," she told them. "It's not going to be little Sally."

BLOOD CELLS
NEEDED NEW IRON

If you have been ill, ailing, out of condition this winter, you owe it to yourself to get a bottle of this new iron tonic and put it to this test.

First get a bottle of Clements' Tonic; next take a good walk—see how far you can go or how long you can work without becoming tired. Then take two tablets three times a day with meals for just 10 days. You'll be amazed at the difference—the energy and endurance you will have acquired. Nerves will be steadier—eyes brighter—appetite back—and your outlook on life entirely different.

Clements' Tonic is dispensed in your city by Ward & Son, on an unconditional guarantee of satisfaction or money back.

"The best tonic I've ever known!" says Clements—"not because it's mine but because it does just what I say it will do."

New Powers Are Sought for NRA

New Definition of Interstate Commerce May Appease Courts

WASHINGTON (AP)—Legislation for still another NRA, created by union of the "stop-gap" recovery agency and the Federal Trade Commission, has been drafted by an administration group.

Whether President Roosevelt had ordered the step or approved the plan could not be learned. However, in setting up the new NRA the president referred to an "opportunity" for future legislation. Word was passed on Capitol Hill Thursday that he is considering a broader law seeking to achieve limited, but substantial, objectives of the old code rule.

It was considered probable that a new bill would contain the following provisions:
1. Virtual consolidation of the Trade Commission and NRA by increasing the number of commissioners—now four with one vacancy—to seven.
2. A new congressional definition of interstate commerce by which the government could regain supervision of some things taken from NRA by the Supreme Court and yet be able to stand the test of constitutionality.
3. Founded on this new definition, a middle-ground industrial rule falling somewhere between the aggressive control of the old NRA codes and the operation through orders to stop unfair practices.

In an experiment on military explosives, a 3-inch common steel shell was found to have burst into 2378 pieces.

Should Be.

A beautifully appointed dinner was given on Thursday evening by Mr. and Mrs. R. M. LaGrone and Mr. and Mrs. Robert LaGrone, at the R. M. LaGrone home on North Hervey street. The special compliment to Mayor and Mrs. Albert Graves, wedding was a very prominent social affair of the early spring. The reception suite of the handsome LaGrone home was a bower of roses, with numerous arrangements of pink radiance roses adorning every point of vantage. The large dining table, perfectly appointed was laid with a handsome imported satin damask cloth, with a center piece of exquisite cut work and lace, on which rested a low bowl of colorful garden flowers, crystal candle sticks holding green candles tied with little completed the appointments. Covers were laid for 12, and a tempting four course dinner was served. During the dinner hour, delightful music was rendered by Miss Harriet Story and Miss Regina Basye.

Mrs. A. C. Whitehurst requests that all pupils in the advanced shorthand dictating class, FERA work, please meet at the Whitehurst home at 10 o'clock a. m. daily.

The Personal Workers Group of the Woman's Auxiliary of First Presbyterian church will meet at 4 o'clock, Monday afternoon at the church.

The Young Business Men's Association requests that all children between the ages of 3 and 10 interested in being in the stage show to be given at the Saenger theater next Thursday and Friday please report at the city hall at 2 p. m. Sunday, June 24. Only two rehearsals and no special costumes are required.

Mr. and Mrs. Neil Bacon Jr., announce the arrival of a daughter Thursday night at Julia Chester hospital. She has been named Betty Jane. Weight 8½ pounds.

The Purpose and Scope of the W. C. T. U.

The Woman's Christian Temperance Union reaches out into every line of service in the home, social and civic life, and touches every action that can be correlated for humanity's good. Its scope is as wide as the universe and limited only by humanity's need. Its motto, "For God and Home and Every Land," holds within its compass all that makes life worth living. Without a local union, there will be little if any temperance work done in a community, especially among children and youth. There are now ten thousand and fifty places in the United States and there are groups of organized women wearing the white ribbon in 54 nations. The workers are all volunteers and each union carries on actively according to a plan and program. Each member is a pledged total abstainer, and the fact of membership is a contribution to the temperance cause. Many rivulets and streams make up a great river and many departments contribute to the progress of the temperance reform.

The local union which urges upon school authorities and teachers compliance with the law requiring scientific temperance instruction in the schools is making a contribution toward character building and good citizenship, and the local union which sponsors a local Temperance Legion helps to establish the youth in temperance principles, which is far more important than reforming drunkards. The local union which promotes the study of government and good citizenship is a patriotic organization worthy of support. Tremendous fields lie before the W. C. T. U. today, and forgetting those things which are behind it is the business of the organization to repeat the program of half a century ago until total abstinence is accepted by the masses of the people as the only safe rule of conduct and prohibition is again written into the law of individual life and becomes a part of the life of every American citizen.

Card of Thanks

We want to thank our friends for their kindness to us during our recent sorrow. Also for the beautiful floral offerings.

Hollywood Calls

Having won the acclaim of her native France, which ignored her as a struggling artist, Lily Pons, after a dazzling of the Metropolitan Opera Company, is shown on her return to New York enroute from European triumphs to Hollywood to appear in the movies.

Resolution For A. J. Fulley

With feelings of deepest regret and in view of the loss of Falcon Lodge No. 67 F. & A. Masons has sustained by the death, on February 9, 1935, of our most faithful and beloved members, and realizing to the fullest extent the still heavier loss sustained by those nearest and dearest to him, and because of the warm personal feeling in our hearts by his kindly, unselfish life be it

RESOLVED, That we tenderly condole with the family of our deceased brother in their hour of trial and affliction, and commend them to the keeping of Him who looks with compassion upon those who mourn, and may these words of appreciation and high regard be a solace in the years to come.

RESOLVED, That we spread upon the records of our Lodge this tribute to his memory, that future generations may know and appreciate the splendid Christian character of this Brother whose words and deeds exemplified in the highest degree the teachings of Free Masonry.

That this heartfelt testimony of our sympathy and sorrow be forwarded to the companion of our departed Brother and secretary of Falcon Lodge No. 67 F. & A. M.

Respectfully submitted:
C. C. Mitchell
W. H. Munro
Roy May
O. L. Mitchell, Secretary.

any specialized products in cans, jars, boxes or cartons for retail trade. Meal does not include grits, flakes or other cereal products. Butterfat includes churned butter and its substitutes, such as cheese, but does not include ice cream.

The tax will apply to goods sold to one person by another, both living within the state, although the goods have to be shipped into the state in interstate commerce before delivery can be made, except where the specific goods belonged to the seller at the time the sale is made. In the latter case the tax would violate the interstate commerce clause of the constitution.

Contractor Responsible
Contractors are responsible for the tax on material installed under contracts with owners of property, and such sales are not taxable against the company selling the materials, but should be paid by the consumer to the contractor.

Machinery and tangible personal property sold to a manufacturer to be used by such manufacturer in the process of manufacturing goods are subject to the tax.

U. S. Still Raises ½ World's Cotton

Record Achieved Despite Drastic Reduction in Home Acreage

Half of the cotton produced in the world last season was produced in the United States, despite the fact that acreage was reduced and average yields were below normal in this country, it is pointed out by Cully A. Cobb, director of the Division of Cotton of the Agricultural Adjustment Administration.

India was second in production, China third, Russia fourth, Egypt fifth, and Brazil sixth. Russia, however, exports practically no cotton and China does not produce enough for domestic consumption. India produced less than one-third as much cotton last season as the United States, and Brazil produced less than one-tenth as much cotton as was produced in the United States.

"The trend of cotton production in India has been upward for the past 35 years," says Cobb. "India may continue to increase cotton production considerably. India has a big population and her land is being brought into production for her farm land for food crops and millions of people in the poorer areas are not getting enough food. "Cotton production has also been increasing in Egypt, but because the amount of land is limited, Egypt's problem is similar to the problem in India. Russia's cotton acreage increased rapidly up to 1930 but since then has shown little change. Cotton production in Brazil has been increasing for many years, and the Brazilian government has encouraged farmers to grow cotton by putting legal restrictions on the planting of coffee. "Cotton production has also been increasing in Egypt, but because the amount of land is limited, Egypt's problem is similar to the problem in India. Russia's cotton acreage increased rapidly up to 1930 but since then has shown little change. The New Deal

(Continued from Page One)

namism which undertook to find out and tell just what was wrong with NRA.

Because he couldn't be depended on to hide unpleasant facts, his name was removed from the list of witnesses who were to have appeared for NRA before the senate committee.

Spank Big Industries

One by one, Henderson and his division took on the major industries of the country which looked upon NRA as a happy hunting ground of special privilege. They decided against:

1. The steel industry, by demanding a spread of its price-fixing basing points.
2. The lumber industry, by recommending lower prices than had been fixed under NRA.
3. The rubber tire industry, by seeing that prices were first so low that the industry subsequently didn't bother about asking a renewal of the arrangement.
4. The coal mining industry, by setting up machinery for review of its prices.
5. The retail coal industry, by a review system for retail prices which led the end authority to resign.
6. The aluminum industry which

dumped its code after Henderson's division insisted on publicity for prices.

7. The automobile industry, whose labor practices were subject of a special investigation by Henderson and Dr. Isidor Lubin, which resulted in a report charging widespread abuse. Henderson also made a report showing an increase in monopolistic prices on government purchases—and refused to tone it down.

His reports on the relative changes in prices, wages, and dividends also raised a row on the inside.

Hush This One

One of the last jobs done by the NRA researchers under Henderson, results of which presumably won't be made public, was compilation of the latest dope on wages and dividends. It will be considered vitally important by those who believe that maldistribution of wealth causes depressions by simultaneously providing too much in profits for investment in capital equipment and not enough in wages to provide a market for the products of capital equipment.

Labor income rose only 20 per cent from 1925 to 1929, it is shown, while dividends and interest from all corporations rose 65 per cent. Labor income began to go down at once in 1929, while capital's drop followed very slowly.

Labor Shows Gain

By 1933 labor income was only 65 per cent of its 1929 average, while dividends and interest stood at 93 per cent. The Henderson report points out that capital has been spared from bearing a proportionate share of the risks of business ups and downs. Nevertheless, labor was benefited—in comparison with capital—in 1934. Its income rose from an index figure of 65 in 1933 to an estimated 73 in the last quarter of 1934, while dividends and interest are estimated at 93 for both periods.

Artificial Heart

(Continued from Page One)

that Lindbergh made the first step in 1931, and that he was the author of an unsigned announcement then in Science describing a new apparatus made at the institute's division of experimental surgery.

The picture, published then, shows an amazingly simple gadget of glass. It illustrates dramatically the mechanical genius, which is Colonel Lindbergh's contribution to the Rockefeller scientists.

It is a glass coil, set on a table which both rotates and rocks. Result—the top of the coil arcs like a Rum-an candle, and the fluid in the coil thereby circulates, in a completely closed system, without any pumps or joints.

This first heart and lungs failed to do the work required. Several changes have been made. The successful one was made this year and the institute's manager said it is quite different from the first.

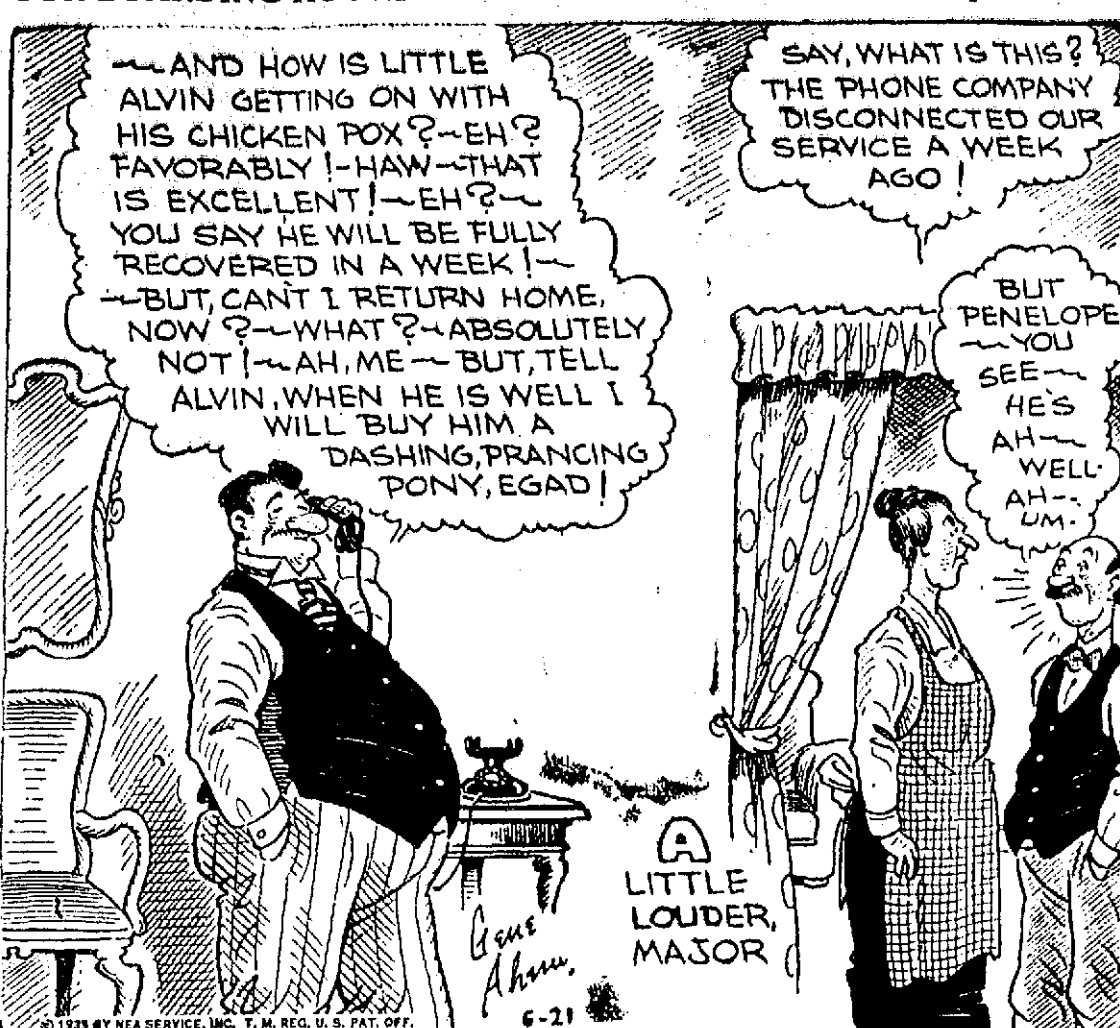

Legal Notice

WARNING ORDER
IN THE HEMPSTEAD CHANCERY COURT
The Georgia State Savings Association of Savannah, et al. Plaintiffs,
vs.
Cora McRae Hanagan et al. Defendants.

The defendants James T. Hanagan and Genevieve Sligh Hanagan, his wife, and Allie Hanagan Daniel are hereby warned to appear in this court within ninety days and answer the complaint of the plaintiffs herein.

Witness my hand and seal as clerk of said court on this 3rd day of June, 1935.
